

Latest Features

Account 4 IT Physio Office is the only office management software you'll ever need.

Now you can manage your entire physiotherapy business with a single application. **Physio Office** is the most comprehensive office management system available to New Zealand physiotherapists. It's a full accounting and clinical management system containing features not available with other software packages.

Designed for the latest Microsoft™ operating environment and employing easy to use Windows™ technology, **Physio Office** takes the hassle out of clinic administration, seamlessly integrating your business operations and improving the efficiency of your office management tasks.

Physio Office manages all your financial information, keeps track of patient details, produces a comprehensive range of business reports and electronically interfaces with ACC. Whether your practice is large or small, **Physio Office** can be tailored to suit your particular business needs.

Account 4 IT Physio Office is the ultimate solution for your busy physiotherapy practice.

Easy to Use

Physio Office is easy to learn and easy to use. With detailed on-line help (written in plain English) you can manage all your business operations easily and efficiently using a single software application.

Physio Office is network aware and multi-user capable and can also support multiple practices within the same system. Because of its modular design **Physio Office** can be tailored to suit any size practice, enabling you to add features at any time to suit your growing business needs.

Enter data once, and that's it! All clinical details are available from a single window showing previous treatment details, ACC approvals and patient information, including their account balance. Access to other functions such as receiving payments, maintaining loan details, accessing debtor statements and much more is only a click away.

Special features like built-in ACC/Insurer rules allow **Physio Office** to recognize the correct requirements for approvals. **Physio Office** monitors your data entry, checking for inconsistencies, and advises you when a treatment will not be accepted. Because practice statistics are gathered automatically, valuable quality assurance details can be available for reporting at any time. Managing your physiotherapy practice couldn't be easier!

Flexible & Fully Featured

Physio Office can make your business more efficient no matter how big or how small it is. A range of modular features give you the flexibility to add the systems you need as your business grows. A typical physiotherapy practice might combine the Health Provider (clinical), Assistant (diary) and Debtors features to start with, adding the Cashbook, Tax (GST) and Payroll features as business increases.

"Account 4 IT Physio Office has helped my practice to become more efficient and grow. It's easy to use and intuitive, and the ability to bill ACC electronically has significantly reduced paperwork and improved cash flow. The statistical reports Physio Office produces allow me to formulate my business goals more proficiently. I appreciate the way Peak Software staff are receptive to our individual needs, and the ease with which the system accommodates changes to ACC rules and the business climate in general. It's the only software I use."

Neroli Amyes, Biokenetik Exercise Centre

Physio Office

Account 4 IT Physio Office takes the hassle out of office management, allowing your focus to move from office administration to patient care.

With **Physio Office**, you choose the features that best suit your business needs:

-  **Assistant** – organizes your appointments and automatically sends you reminders
-  **Cashbook** – efficiently monitors your cash flow, reconciles your bank statements and much more
-  **Debtors** – keeps track of customers and accounts receivable
-  **Health Provider** – easily manage and maintain patient treatment regimes and a range of clinical information
-  **Names and Addresses** – a common repository for all your patients and supplier details
-  **Payroll** – collects and processes payment details so you can easily produce employee/contractor and IRD reports – never touch a PAYE table again
-  **Receipt/Bank Summary** – collects payments and generates deposit summaries
-  **Tax** – automatically collates GST data from all parts of the program making GST returns a snap

ACCOUNT4IT

Peak Performance

The innovative team at Peak Software have been developing award winning software solutions for more than a decade. **Account 4 IT Physio Office** is the most comprehensive clinical management software available, and is used by physiotherapy professionals throughout the country.

“We appreciate life in a busy physiotherapy practice and have designed our systems to be easy to use and intuitive”, says Director Kevin Bolitho.

Director Graeme Hall adds, “The modular design makes it easy for the software to accommodate your practice as it grows and changes.”

The real strengths of **Account 4 IT Physio Office** lie in its ability to get the most out of your business by providing a range of key management reports on financial, clinical and statistical information. You can be confident of making sound business decisions with **Account 4 IT Physio Office**.

But if you do have questions the team at Peak are there with friendly, toll-free telephone support during normal business hours.
